

As an XM subscriber, I believe that we are paying for the right to listen to any traffic and weather broadcast that is available for us. I urge the FCC to reject the NAB's petition 04-160. XM is a wonderful technology that in my vast travels around the eastern part of the US, allows me to know where to avoid and when to expect certain travel conditions such as snow and ice. XM provides this immediately. Otherwise, I am on my cell phone calling to people to turn on the Weather Channel, when I can turn the knob of my radio and the weather is right there.

Again, please reject NAB's petition 04-160 and oppose HR 4026.
